
How to make Lavender

WORKSHOP

the-tsubaki.com

Materials

Lavender 1 : 3cm x 3cm - 5

Lavender 2 : 3cm x 3cm - 5

20 gage green wire : 25cm - 2

Wool blend felt is recommended,
but any types of felt works too.

Tools

Hot glue gun and glue stick

I use a Surebonder glue gun as it has the finest tip but it's difficult to get if you are in the UK. I used one from Beeway before and I liked it too. (Beeway® 20W Mini Glue Gun with 50pcs 7mm x 150mm)

Fabric scissors

Sharp fabric scissors are essential to work with flower making. Fiskors micro tip scissors are recommended. They are comfortable to hold and not too big, most importantly they are really sharp.

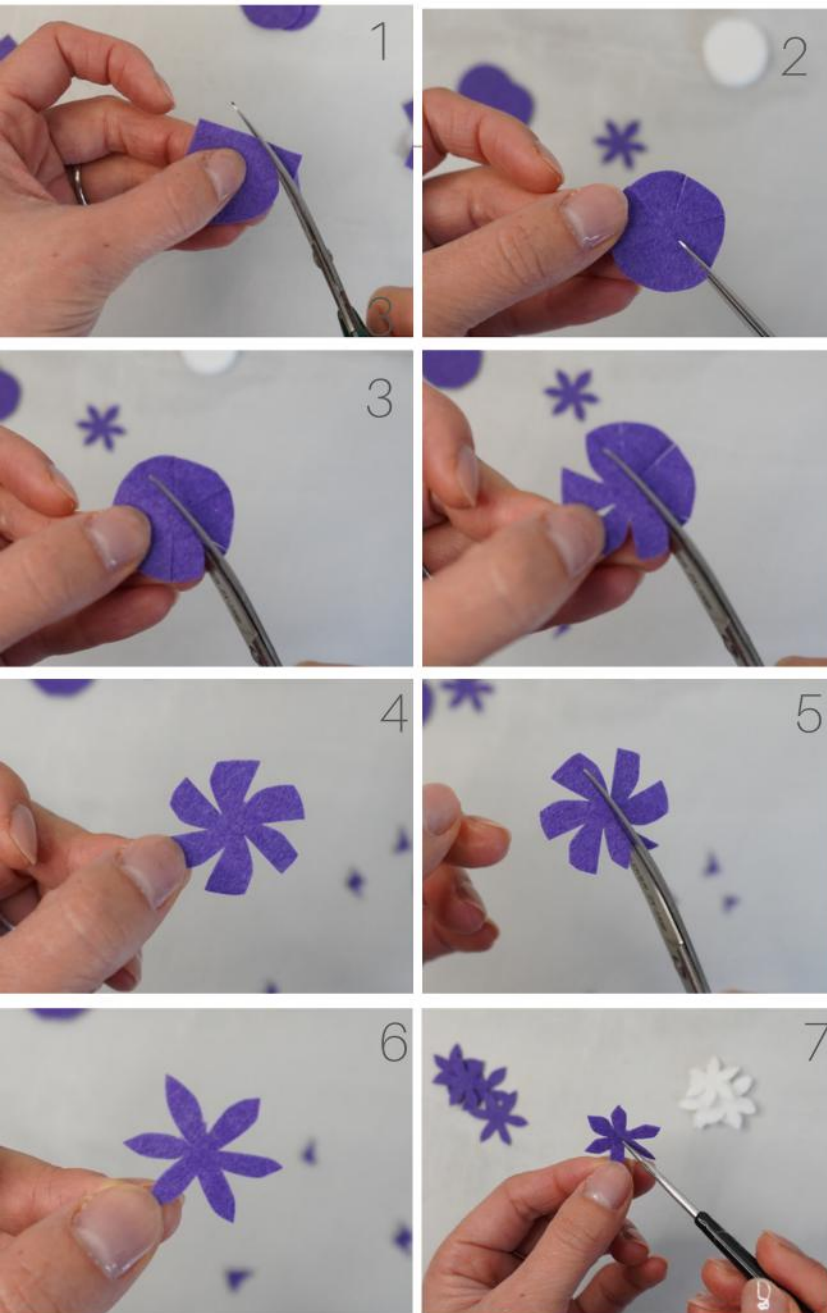

Awl for drilling holes

You can use scissors if you don't have one.

Tips

Tip 1 ! Using smaller fabric scissors gives a more detailed result.

Tip 2 ! When you want to work with a small pieces of petal, it's a good idea to stiffen fabric before cutting. You can find how to stiffen fabric in a video.

Cutting

Lavender 1 - 3cm x 3cm

Lavender 2 - 3cm x 3cm

1. Cut into circles.

2. Cut evenly split 6 slits between the circle.

3. Cut off the right side of each slit to make it gentle curve.

4. This picture shows how the flower petals should look like at this point.

5. Turn it over and do the same cut as you did at Picture 3. Cut off the right side of each slit to make it gentle curve.

6. The petals look like Picture 6.

7. Make a hole in the middle using an awl. Or fold in half and make a little cut in the middle so that a stem can go through. If you don't have an awl, fold it in half and cut a small cut in the middle with scissors.

Cut the rest of felt in the same way.

Assembling

Lavender 1

8. Put 5 pieces of petals through the wire.

9. Put a very small amount of glue on the top of the stem.

10. Squeeze the part to be glued from two directions. Fold in half and pinch gently very quickly.

11. Turn the stem 90 degrees and pinch the same petals.

12. This is how it looks like at this point.

13. Glue 1cm below the bottom of the first petals.

14. Squeeze the next petals as you did for the top petals.

15. Repeat the same way for another 2 pieces of petals.

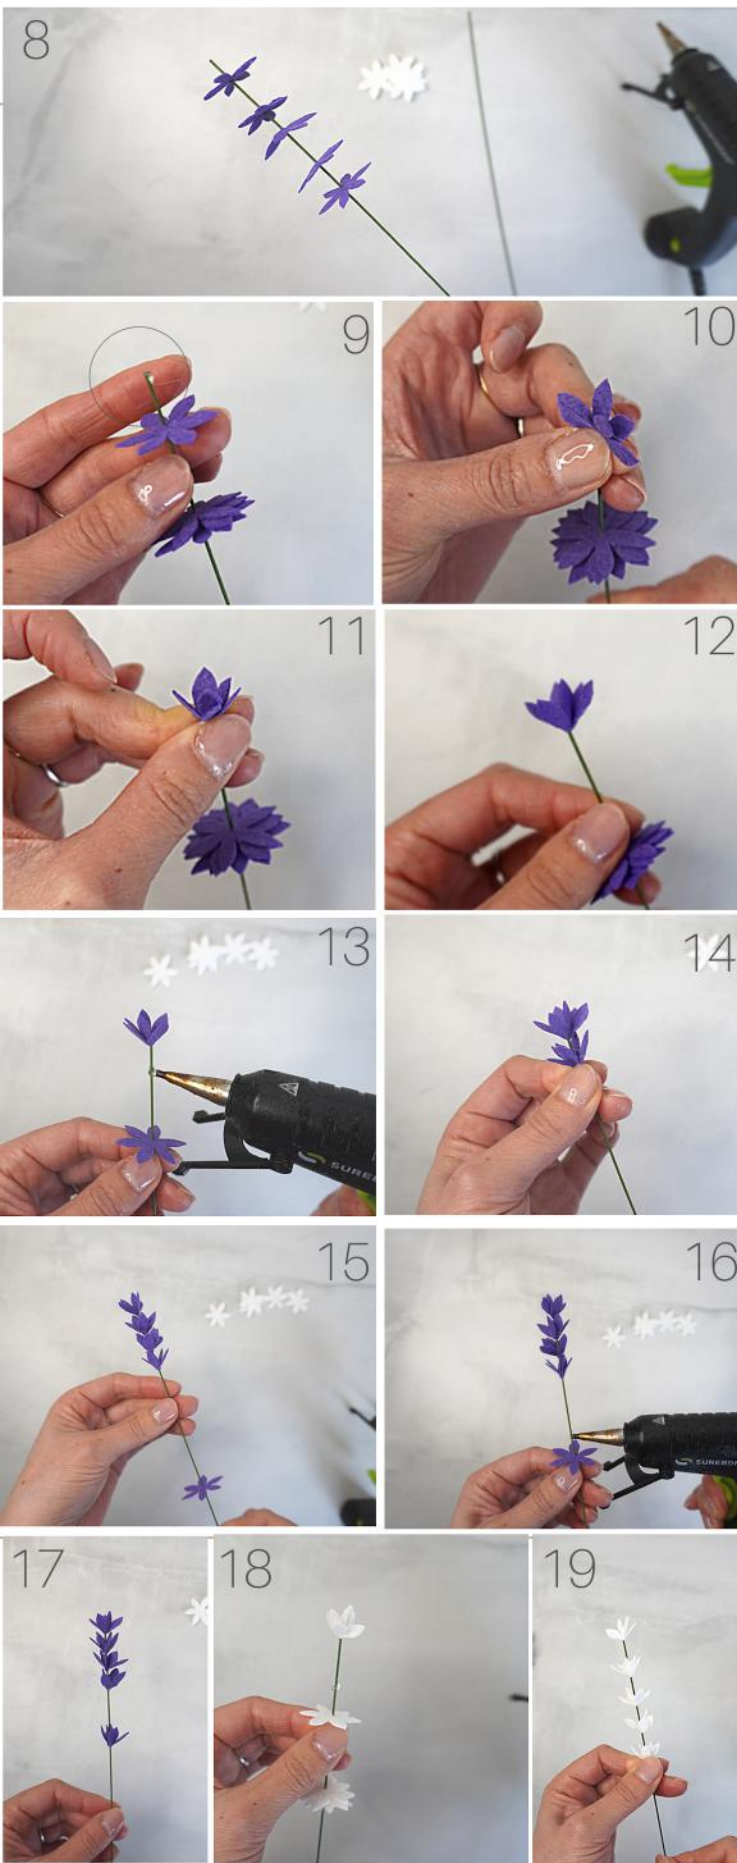

16. Glue 3cm below the bottom of the previous petals and squeeze it.

17. You completed a Lavender 1!

Lavender 2

18. Do the same process from up to Picture 12. Glue 2cm below the previous piece of petal. Repeat for all of the petals.

19. You completed a Lavender 2!
